Pacagen RE:YOU

Take-home Assignment

Product / Marketing Associate

CONFIDENTIAL

Thanks for your interest in joining us.

We built this assignment because interviews rarely show what a job is actually like day to day. So instead of quizzing you, we'd rather hand you a real, small version of the work and let you run with it.

There's no single right answer. We're far more interested in how you think and tackle problems than whether you land on the "correct" idea.

A quick promise

- We'll read every submission thoughtfully.
- There's no trick question hidden in here.
- This mirrors an actual slice of the role.
- If this feels fun rather than painful, that's a good sign for both of us.
- Bring your own voice and taste.

Pacagen RE:YOU

Your assignment: Upgrade a product you own

1

Pick a product you own

Any product in your life (something you personally bought and use). It does not need to be related to Pacagen.

2

Find one thing to change

One specific, real improvement you'd make to it. Not a redesign of everything.

3

Pitch the improved version

Build a short presentation that sells this upgraded product to a cold online audience, as if it were ready to ship. More details can be found on the following slides.

Examples: your water bottle, a snack you buy weekly, your skincare, or your running shoes.

A practical guide:

Format

Submit as a single presentation
(PowerPoint, Google Slides, or PDF.)

Deadline

3 days after receiving this assignment.

Content

Section	What we're looking for
1. The product + the change	One product you own, one clear improvement, clearly explained
2. Why the change	Why this matters now, and why you (or people like you) would pay attention to a fix or an improvement
3. Marketing it	Meta ads (1 video concept + 2 static ads) OR a website page mock up (product page or an advertorial)

More on section 3:

Pick ONE of the two paths below. Your job: convince a cold audience (people who've never heard of this product) that they should exchange their hard-earned money to try it now.

OPTION A

Meta ads

- 1 short video ad
- 2 static ad

OPTION B

Website landing page demo

- A single product landing page mockup
- Or an advertorial
